DETAILED ACTION

1. Claims 1-32 have been examined. Application 09/777,902 (INFORMATION COMMUNICATION SYSTEM, INFORMATION COMMUNICATION METHOD, AND INFORMATION PROVISION BUSINESS METHOD) has a filing date 02/07/01 and a foreign priority 2000-031346 (02/09/2000).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Herz (U.S. 6,029,195).

As per claim 1, Herz teaches:

An information communication system in which a service information provider registers in advance service information in information provision means, managed by a carrier, for providing the service information, and a user receives the service information by accessing the information provision means via a communication network, comprising:

a database for separately storing profile information indicating attribute information of the user and preference information indicating a preference and taste of

Art Unit: 3622

the user upon encrypting the profile information and preference information (see column 5, lines 5-67; column 40, lines 19-33; column 41, lines 14-21; column 44, lines 1-39).

As per claim 2, Herz teaches:

A system according to claim 1, wherein the profile information and preference information are pieces of information for which the user gave consent to disclosure (see column 5, lines 36-40).

As per claim 3, Herz teaches:

A system according to claim 1, further comprising means for generating a keyword for searching/ extracting information stored in said database on the service information provider side (see column 5, lines 5-65; column 6, lines 16-59; column 7, lines 1-16; column 2, lines 39-65; column 63, lines 9-24).

As per claim 4, Herz teaches:

A system according to claim 2, further comprising means for generating a keyword for searching/ extracting information stored in said database on the service information provider side (see column 5, lines 5-65; column 6, lines 16-59; column 7, lines 1-16; column 2, lines 39-65; column 63, lines 9-24).

As per claim 5, Herz teaches:

A system according to claim 3, further comprising information search means for searching said database to extract information in accordance with the keyword and supplying the extracted information to the service information provider (see column 5, lines 5-65; column 6, lines 16-59; column 7, lines 1-16; column 2, lines 39-65; column 63, lines 9-24).

As per claim 6, Herz teaches:

A system according to claim 4, further comprising information search means for searching said database to extract information in accordance with the keyword and supplying the extracted information to the service information provider (see column 5, lines 5-65; column 6, lines 16-59; column 7, lines 1-16; column 2, lines 39-65; column 63, lines 9-24).

As per claim 7, Herz teaches:

A system according to claim 5, wherein said information search means also supplies key information required to decrypt the extracted information (see column 93, lines 9-13).

As per claim 8, Herz teaches:

A system according to claim 6, wherein said information search means also supplies key information required to decrypt the extracted information (see column 93, lines 9-13).

As per claim 9, A system according to claim 1, further comprising storage means for, when the user accesses said information provision means, obtaining the profile information and preference information in accordance with contents of the access to said information provision means, and storing the profile information and preference information in said database (see column 5, lines 5-67; column 40, lines 19-33; column 41, lines 14-21; column 44, lines 1-39).

As per claim 10, Herz teaches:

Art Unit: 3622

A system according to claim 9, wherein said storage means acquires and stores terminal attribute information of the user and communication attribute information required to access said information provision means as the profile information (see column 4, line 35 – column 5, line 60).

As per claim 11, Herz teaches:

A system according to claim 9, wherein said storage means acquires and stores the preference information on the basis of link information obtained when the user sequentially selects menu items on a display screen in accessing said information provision means (see column 6, lines 16-43; column 8, lines 1-21).

As per claim 12, Herz teaches:

A system according to claim 9, wherein said storage means acquires and stores a filter condition as the preference information which is set when the user receives information from said information provision means and indicates necessity/non-necessity of information (see column 18, lines 10-30).

As per claim 13, Herz teaches:

A system according to claim 9, wherein said storage means acquires and stores positional information and a type of communication line, as the preference information, when the user is accessing (see column 94, lines 48-67; column 95, lines 56-60).

As per claim 14, Herz teaches:

A system according to claim 9, wherein said storage means acquires and stores as the preference information a use frequency of an access device through which the user is accessing (see column 57, lines 55-67).
